

SonicSpider WebWidget Pricing

The cost of putting any of our WebWidgets on your web site will depend on how many widgets are desired and how much they are used.

Basic Set Up Cost: \$50.00 per location. Any customizations are extra.

Monthly Use Fees:

Our Webwidgets are dynamic tools that feed off databases on SonicSpider servers. There is a cost to maintain each widget and make sure that they are functioning properly. The client pays for how much the widget is used. This usage is measured by the amount of hits that each widget gets. Each hit is charged at \$0.05.

The minimum charge is \$25.00 to form a Hit Account, and the monthly hits will be deducted from that amount at the end of every month. Once the account is down to \$5.00, SonicSpider will charge the credit card on file for another \$25.00. If the client uses up the \$25.00 Hit Account in less than one month, your Hit Account will be increased in increments of \$25.00 based on the current highest hit count.

Per Hit Charge: \$0.05 a Hit. Minimum of \$25.00 Hit Account

Payment Policy: Credit Card Auto Billing

Cancellation Policy: A 30 day written notice is required
