

Website Health Report

Our Website Health Report will help you see where your website is at so that you can take the right steps for it to move your business forward!

Your report will include:

- An entire site map so you can see how many pages you really have
- How well search engines can crawl and index your website - can they even see you!
- Broken links that maybe confusing clients
- Which pages of your website are indexed, and by which search engines
- What language your website was built in and how it affects client usability
- Multi media plug-in locations and how they may be affecting client usability

Why do you need a Website Health Report?

- If you are planning to make updates to your website and it has been awhile since it has been worked on. It is critical to get a complete picture of where you stand.
- If you are planning on using your existing website to promote your your business online, you need to make sure there is nothing holding you back!
